

## Custom Berm Form

Create a berm to fit into spaces and meet your specific spill containment requirements\*. Berms help comply with EPA regulations concerning containment and spill prevention (SPCC)—compliance depends upon specific application. Specify your requirements on the order form with as much detail as possible. Submit this form using the instructions on page 2, and a Justrite representative will respond within 1 business day with an email confirmation.

### I know what I want.

Describe what you are looking for in your berm, including quantity desired. If you are not entirely sure, please answer the questions in the next section to help us work on a solution for you.

## Help me determine the best product for my application.

Answer as many questions as you can, as it will help our engineers give you the best solution possible.

**1. Describe the application and quantity required.**

---

---

---

**2. How many and what type of containers, equipment, or vehicles will be contained within the berm?** (e.g. Drums, IBC Totes, Tankers)

---

---

**3. What is the volume of the largest single container included in item 2?**

---

**4. What is the footprint/size of the object being contained?**

---

**5. Is additional working space needed around the footprint in item 4? If so, how much on each side?**

---

**6. What chemical/s will need to be contained?**

---

**7. Approximately how long could a spill in the secondary containment be left before it is removed and cleaned?**

---

**8. How often will objects/people be moved in and out of the containment?**

---

**9. What environment will the berm be exposed to**  Indoor  Outdoor

If outdoors, for what time periods and frequency? \_\_\_\_\_

Describe the traffic frequency and type of equipment that will be moving in and out of the berm.

---

Are extreme rain events in the area common? \_\_\_\_\_

What is the operating temperature in the area? (Please indicate any temperature extremes lower than -30°F/-30°C)

---

**10. Any other comments?**

---

**11. If there are pictures of the application and/or area that the product will be installed, please email along with the application to a Justrite Business Development Specialist at [safetyexperts@justrite.com](mailto:safetyexperts@justrite.com)**

**Custom berms are not returnable.** Because of the complex nature of chemicals, Justrite cannot offer specific recommendations on chemical compatibility. However, to aid in the decision process, compatibility charts are available for a select group of chemicals and materials.

*\* Most products in the flexible containment line can be custom-configured. Some restrictions apply.*
