### **Justrite Announces New Line of Safety Pumps for Drums and Pails**

**Deerfield, IL April 27, 2021** — — Justrite, a global leader in industrial safety products, announces the launch of a line of safety pumps for dispensing or transferring flammable liquids from drums and pails.

As the demand for hand sanitizer has soared since the onset of the COVID-19 pandemic, many companies are opting to purchase bulk containers of these solutions and dispense them into smaller containers as needed.

Most hand sanitizers, though, are considered a Class IB or Class IC flammable substance. This means that these substances—that are now widely used all over the country—have the potential to ignite if not properly handled.

“Our priority is to supply companies with the equipment they need to handle these materials safely,” said Mark McElhinny, President and CEO of Justrite Safety Group. “Our safety pumps offer an easy-to-use solution for transferring and dispensing flammable liquids such as alcohol-based hand sanitizers.”

These Justrite safety pumps will deliver a smooth and controlled flow when dispensing liquids from large containers to smaller containers. Each pump is equipped with dual flash arresters to mitigate external flame flashbacks. The pre-assembled bonding and grounding clamps included with the pumps eliminate the risk of static electricity when dispensing flammable liquids. All Justrite safety pumps are FM approved and compliant with OSHA regulations.

Safety pumps are available in stainless steel or electro zinc-plated options and can be used to dispense liquid from 30- and 55-gallon drums, and 5-gallon pails. And, exclusive to Justrite is a fully featured, 5-gallon polyethylene safety can with integral safety pump attached for easy dispensing at the point of use. The FM-approved, polyethylene Type I safety can with a hand-operated stainless steel safety pump provides the ideal solution for transferring of dispensing flammable liquids such as alcohol-based hand sanitizer.

“Ultimately, these safety pumps will enable companies to comply with regulations and keep personnel safe,” said McElhinny.

#### **About Justrite Safety Group**

Justrite Safety Group is a growing family of industrial safety companies, including Justrite, NoTrax, Checkers, Eagle, and more. Justrite is a global leader in manufacturing a range of industrial safety products. Today, Justrite is recognized as one of the largest integrated manufacturers of industrial safety products globally. Based in Deerfield, Illinois, Justrite manufactures its own products in ISO-certified facilities and offers global distribution capabilities with distribution centers throughout the United States and in Europe.
